

TileExclusive – Acoustics captured in an elegant form

Geometry that redefines your interior's acoustics and style

TileExclusive – Feltdecor® Acoustic Panels

TileExclusive is a collection created for interiors where aesthetics go hand in hand with functionality. The five unique designs available in the catalogue allow for the creation of harmonious arrangements or bold, decorative compositions that transform a wall from a mere background element into the focal point of the space. For those seeking even greater flexibility, we have prepared over thirty additional variants, ready to explore and configure in the FDstudio application. The panels effectively reduce noise while creating an atmosphere that supports relaxation and concentration. Subtle incisions and the soft felt surface add depth and warmth to the interior while significantly enhancing room acoustics.

This solution performs equally well in private residences and commercial environments – from offices and hotels to meeting rooms and restaurants. The panels effectively reduce noise while fostering an atmosphere conducive to relaxation and concentration. With a diverse range of designs and an extensive colour palette, they can be easily tailored to suit individual requirements and the unique character of any interior.

TileExclusive also offers the possibility to enrich arrangements with premium elements, including natural FlexWood, elegant marble panels, and metallic Dibond accents in shades of gold, silver, copper, and black. Such combinations open the way to designs that are not only practical but also luxurious, going beyond standard acoustic solutions.

Available colors: According to t.line color chart

Minimum order: 1 panel

Packing: 600 × 500 × 155 mm (12 panels, format 592 × 444 mm)

Installation method: Sticking to the wall with mounting glue

Cutting method: V-cut at an angle of 30°

Edge finishing: V-cut at an angle of 30°

Panel dimension: 148 × 444 × 12 mm

3D models: Available from distributor

The **TileExclusive** collection has been developed with designers and discerning users in mind who value elegance combined with functionality. The catalogue presents five key models that best reflect the character of this series, enabling the creation of both minimalist and more decorative interior concepts.

TE_N07

The full offer includes over thirty additional variants, available exclusively in the FDstudio application, where users can explore the extended model catalogue and place orders directly with a distributor.

The TileExclusive collection can be further enhanced with premium elements that lend interiors an even more distinctive character. With these additions, the wall becomes not only a functional acoustic solution, but also a refined design feature.

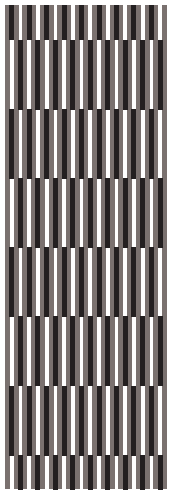

Three categories of complementary elements are available:

FlexWood – a natural wood finish that introduces warmth and an organic touch to the interior.

Marble tiles – a luxurious accent, ideal for spaces requiring a prestigious finish.

Brushed Dibond – metallic surfaces in gold, silver, copper, and black tones that emphasise the modern, industrial character of the arrangement.

These combinations extend the design potential of the TileExclusive collection beyond standard acoustic solutions, opening the way to bespoke and luxurious projects.
